Issue One Blanket Purchase Contract for all Leak Test Equipment

Receive Preferred Scheduling Status

Improve Maintenance Personnel Training

Verify Calibration Standards Routinely

- **A qualified technician with extensive experience in leak test systems and applications visits the customer's plant on a routine basis.**
- **Test equipment receives scheduled maintenance on all critical operational components.**
- **Service technicians help, advise, and train plant maintenance personnel to respond effectively to daily maintenance issues.**
- **Calibration standards are checked during each visit to assure that they are current.**
- **Phone support is readily available in case of emergency problems 24 hours/7 days a week**
- **Customer receives a discount on all service visits as a result of having a preventive maintenance contract.**
- **Contract customers are given preferred status for all service**

situations.

- **A maintenance contract can include leak test equipment supplied by other vendors once CTS reviews their configuration and operating conditions.**
- **Having one standing contract for service can simplify purchasing and maintenance requirements.**
- **Overall leak testing functions will improve because of routine maintenance, periodic training, and on-site application advice.**
- **Typical maintenance issues are avoided before they become problems with a Preventive Maintenance Contract.**

Contact Cincinnati Test Systems for a quotation on a **Preventive Maintenance Contract**. Upon review of the test equipment, CTS will define the spare parts requirements, quote the periodic visit contract, and develop a maintenance schedule best suited for the equipment's operational requirements. Extra and extended visits will receive the same discounted pricing as the scheduled contract.
